Part 4 Projection Installation

Method 1 : Using Velcro, stick one side of the velcro to the metal eyelet of the projection screen. Generally, 6 velcros are enough.

Then another 6 velcros are affixed to the wall. When attaching the velcro to the wall, pay attention to make the velcro on the projection screen and the velcro on the wall strictly aligned so that the projection screen is smooth after being affixed;

Method 2: Use hooks ,nail 6 hooks on the wall, so that each hook can hook the metal eyelet;

Method 3: Using a rope, find four long sticks, tie the projection screen to the stick, and then hang the stick on the wall;

Method 4 : Using a standing stand, such as a studio stand, hang the projection screen on the stand and fix the four corners;

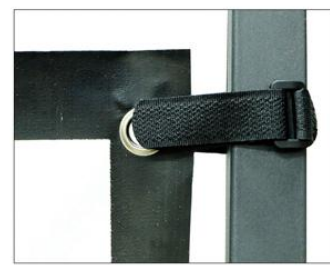

The following is some common installation tolls, they are nails, bungee ball, velcro, rope, adhesive velcro.

tool: nails

tool: bungee ball

tool: velcro

tool: rope

tool: adhesive velcro

Part 5 Storage and Cleaning of Projection Screens

★When the projection screen is idle, cover the projection screen with black cloth to prevent direct sunlight and other stains;

★Even if you use the projection screen for a long time, it will not turn yellow; if you get dust, you can wipe it off with a wet rag.

Part 6 Protection of Projection Screen

1. Whether the projection screen is in opening, in storage, or in installation, please

gently operate. This projection screen is made of PVC material and it is easy to crease. Therefore, we use roll-up packaging, so when you use it, please handle it gently.

2. It should not be exposed to the sun. Prolonged sun exposure may cause the projection screen to become dull. Therefore, store it in a cool place.

3. Do not bake the projection screen or use the washing solution. Otherwise, the projector screen will be deformed after drying.

4. When not projecting the screen for a long time, please roll up the screen and put it in the package to prevent the external scratch damage;

Part 7 FAQ

Q: What to do if the metal ring breaks during installation?

A : If the metal ring is broken during installation, please contact the seller immediately and attach a damaged photo. We will resend the new projection for you.

Q: If after half a year, how to do with the crease if it comes out ?

A: Please re-roll up the projection screen with a EPE Foam and apply it with tape on the outer layer and lay it flat on the ground. The crease can be eliminated the next day. Note: When re-roll up it with a EPE Foam, be sure to roll it tightly.

Q: What if the projection screen gets dirty?

A: First, use a damp cloth, wring out the water, and gently wipe it in a stained area. In general, dust-like stains can be removed; If it cannot be removed, contact the seller for replacement. This product provides a lifetime warranty.

Q: Why is the length, width and size of the projection screen actually received different?

A: This projection screen is purely handmade. There may be some errors in length and width. If your curtain is inaccurate and affects your use, please contact the seller immediately to refund or replace.
